

Analog Computing-In-Memory Macro with Block-Floating-Point

Wonkyung Han, Dohyun Kim, Jihoon Park, Juheun Lee, Sukhyun Choi, **Wonjun Han and Jae-Joon Kim** Seoul National University, Korea

Background

Conclusion

BFP format has not only high accuracy as FP but also high density as INT.

Multiply-and-Accumulation results show good linearity thanks to MOMCAP.

BFP CIM saves ~57% power than previous work.

Acknowledgement

The chip fabrication and EDA tool were supported by the IC Design Education Center(IDEC), Korea.
